

### Our Company

Think Structural is a premier structural engineering consultancy with a combined 40 years experience supporting the resource, construction, marine and infrastructure clients. Our team has extensive experience in offshore construction, heavy lifting, steel frame and concrete module design. Many Think Structural team members are Chartered Engineers (CPEng) registered with Engineers Australia and the Board of Professional Engineers of Queensland. As a customer-focused, quality-driven organization, Think Structural uses industry-best practices for continuous improvement, process streamlining and increased quality to meet our customer's complex operational goals and requirements.

### Our Vision

We maintain the highest ethical standards while diligently executing our client's mission. The heart of our mission is to exceed customer expectations through efficient project execution, innovative solutions and above all design excellence.

### Our Team

We hire experienced professionals that can provide high quality services to every client in the following areas:
